Sulfuric Acid-30

Arcane Chemicals offers Sulfuric Acid (H2SO4) in 30% concentrations. The color is pale yellow. It is a clear liquid without any turbidity or nitric acid content. The concentration of the 30% grade varies between 30% and 35%. Sulfuric acid finds wide ranging applications in various industries for manufacture of dyes, drugs, fertilizers, explosives, detergents, salts and acids as also in petroleum and metallurgical industries. It is also used for domestic purposes such as drain cleaning and rust removers. Sulfuric acid is one of the chief components in

lead-acid batteries, in manufacturing rayon and as a desiccant when harvesting potatoes in addition to waste water treatment. Sulfuric acid is extremely hazardous especially in high concentrations. It is highly reactive and corrosive. We recommend that users should use extreme care in transportation, storage, handling and processing when working with this chemical and follow MSDS guidelines. Arcane Chemicals offers sulfuric acid in 30% and 80% concentrations only in tanker loads.

Product Identifiers

Categories	Specifications
Product Name	Sulfuric Acid 30%
Chemical Name	Sulfuric Acid
Chemical Formula	H2SO4
Molar mass	98.08
CAS Number	7664-93-9
UN Number	2796
Packing Group	II
Hazard Class	8

Properties

Categories	Specifications
Solubility (In Soluble)	Water
Physical State	Hygroscopic Oily Liquid
Apperance	Aqueous Solution
Purity	30 – 35%

PACKING DETAILS:

1. 60 Litre. HM-HDPE Open Top Carboy with Plastic Liner, Contains 50 Kgs. Net Wt.
2. 30 Litre. HM-HDPE Open Top Carboy with Plastic Liner, Contains 15 Kgs.Net Wt.
3. 210 Litre. M S Drum with Plastic Liner.
